

Boise County Wildfire Mitigation Plan - 2005 Update

Note: The update of the plan was completed by the middle of February 2005. This spreadsheet was used to 1) track changes in planned activities from the 2003 plan to the 2005 update - see "Sheet 1-2003-->2005 Resolution" and 2) display projects submitted for inclusion in the 2005 update - See "Sheet 2-2005 Projects". In the 2005 update the categories of 'mechanical' & 'rxburn' were dropped and a 'status' category was added to identify if a project is 'completed', 'active' (a decision document is completed), 'planned' or 'dropped'. The status information from Sheets 1 & 2 were used to produce three shapefiles (accomplished, active and planned). The details of the development of these shapefiles are located in Sheet3-Layer Development.
